

WIFI CONFIGURATION

(TECOM modem only)

Open Internet Explorer first.
(or your favourite Web browser)

On the address bar:

Type ***http://192.168.1.1***
and press ***Enter key***

A pop up window is appearing asking you to type a username and a password:

Username : **support**
Password : **dfg123ty**
(Small characters only)

You will get our **TECOM** interface.
In the menu on left part of your screen:

1. Click on **Wireless**

2. Then tick the box
Enable Wireless

3. Click on **Save/Apply**

On the left part of your screen:

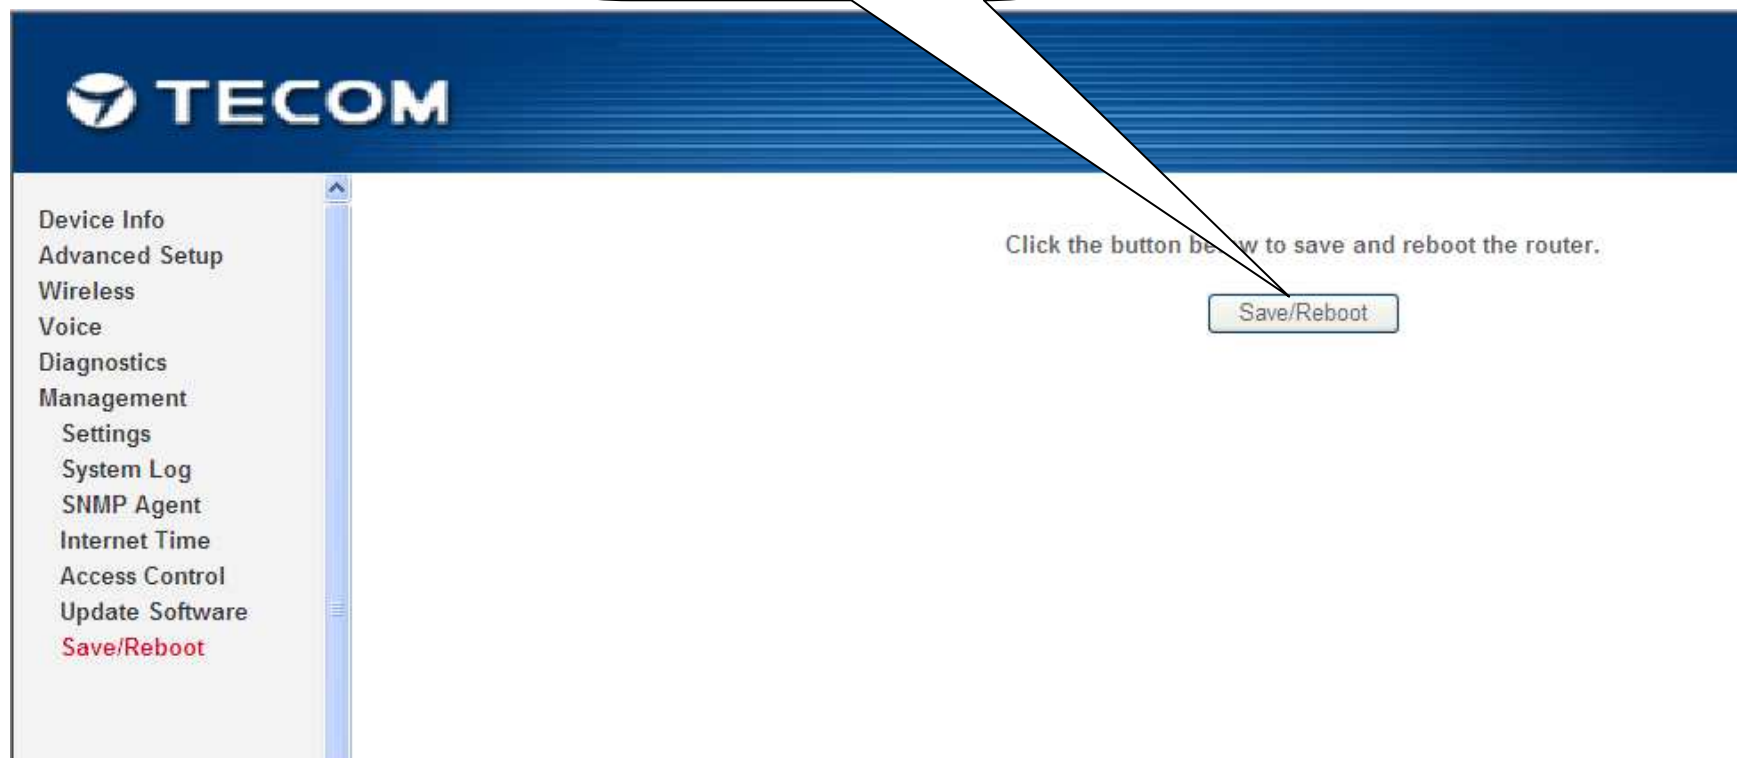

The screenshot shows the Tecom web interface. At the top left is the Tecom logo. To its right, a yellow box contains the text "Tecom AH4021" and "http://192.168.1.1". Below the logo is a vertical navigation menu with the following items: "Device Info", "Advanced Setup", "Wireless", "Voice", "Diagnostics", "Management" (highlighted in red), "Settings", "System Log", "SNMP Agent", "Internet Time", "Access Control", "Update Software", and "Save/Reboot". The main content area is titled "Settings - Backup" and contains the text "Backup DSL router configurations. You may save your router configurations to a file on your PC." and a "Backup Settings" button. Two callout boxes are present: one pointing to the "Management" menu item with the text "Select *Management*", and another pointing to the "Save/Reboot" menu item with the text "Then click on *Save/Reboot*".

Select *Management*

Then click on *Save/Reboot*

In the middle of the screen:

Click on **Save/Reboot**

Close Internet Explorer down.

Wait until DSL light is on and stable.

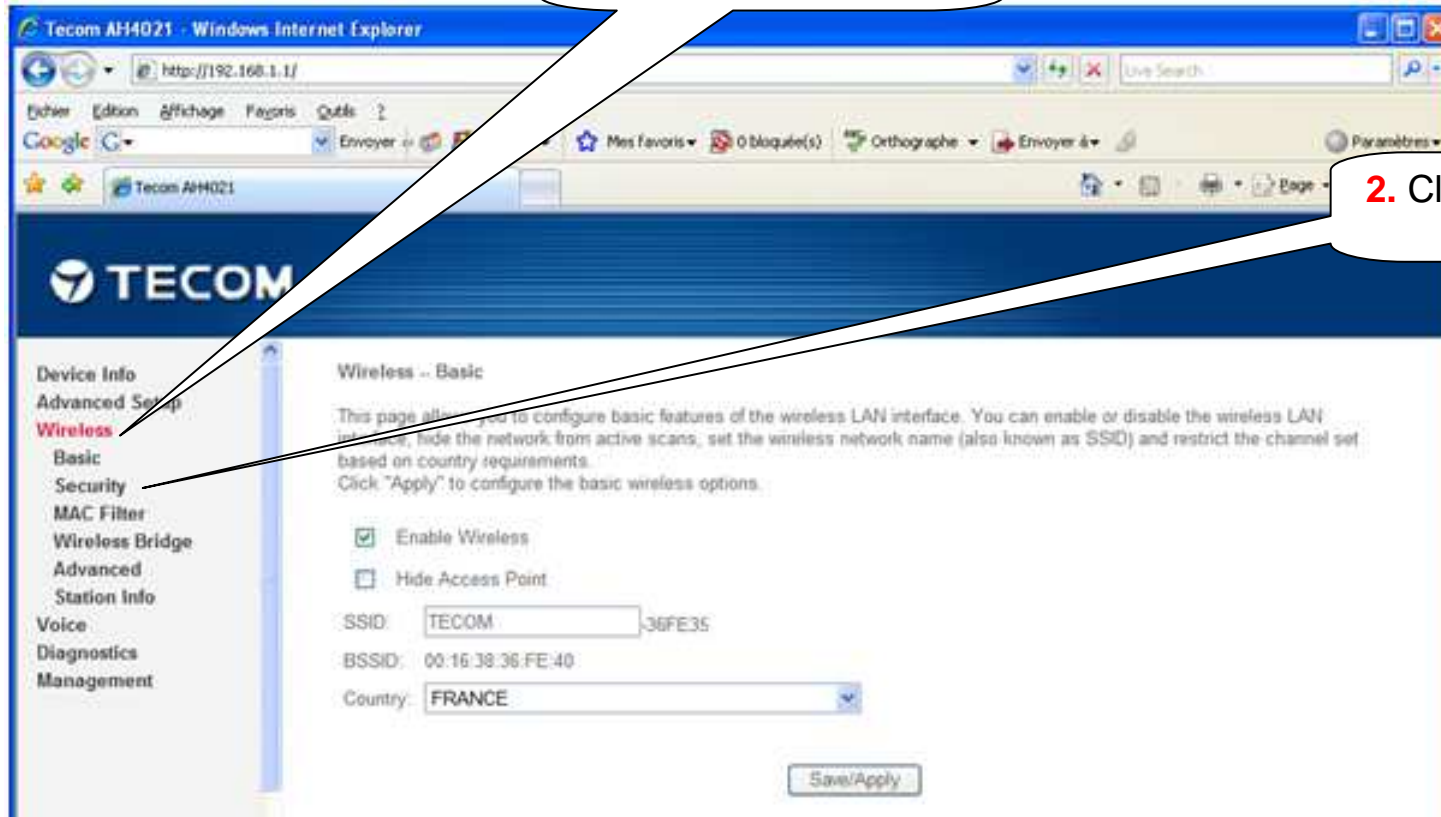

Connect to the Internet.

You can now configure your Wifi connexion using your Wifi card.

Note: The WEP key is on a sticker situated under the modem.

On the left part of your screen:

1. Click on **Wireless**

2. Click on **Security**

On the next page :

3. Click on **Set Encryption Keys**

See below the wep key :
